JOURNAL OF STATISTICAL PHYSICS

Vol. 62, Nos. 1/2 January 1991

CONTENTS

ARTICLES

Absence of Self-Averaging of the Order Parameter in the Sherrington–Kirkpatrick Model 1
L. A. Pastur and M. V. Shcherbina

Large-n Limit of the Heisenberg Model: Random External Field and Random Uniaxial Anisotropy 21
B. A. Khoruzhenko

Exact Analysis of a Lattice Gas on the 3-12 Lattice with Two- and Three-Site Interactions 35
Julian J.-L. Ting, Simon C. Lin, and F. Y. Wu

Interface Interactions in Modulated Phases and Upsilon Points 45
Kevin E. Bassler, Kazuo Sasaki, and Robert B. Griffiths

A Twist on Chiral Potts 89
Brian Davies

Finite-Size Effects and Phase Transition in the Three-Dimensional Three-State Potts Model 105
O. F. de Alcantara Bonfim

On the Swendsen–Wang Dynamics. I. Exponential Convergence to Equilibrium 117
Fabio Martinelli, Enzo Olivieri, and Elisabetta Scoppola

On the Swendsen–Wang Dynamics. II. Critical Droplets and Homogeneous Nucleation at Low Temperature for the Two-Dimensional Ising Model 135
Fabio Martinelli, Enzo Olivieri, and Elisabetta Scoppola

Monte Carlo Simulation of Phase Separation and Clustering in the ABV Model 161
Khwaja Yaldram and Kurt Binder

Stability of Interfaces in a Random Environment. A Rigorous Renormalization Group Analysis of a Hierarchical Model 177
Anton Bovier and Pierre Picco

Classical "Freezing" of Fast Rotations. A Numerical Test of the Boltzmann–Jeans Conjecture 201
Oscar Baldan and Giancarlo Benettin

New Microscopic Approach to the Statistical Mechanics of Chemical Association 221
Kåre Olaussen and George Stell

Gibbs States and Equilibrium States for Finitely Presented Dynamical Systems 239
V. Baladi

A Note on the Artuso–Aurell–Cvitanovic Approach to the Feigenbaum Tangent Operator 257
Mark Pollicott

Invariants for the Critical Points in Network Models of Flow in Porous Media 269
Rolf Maier and W. G. Laidlaw

Staggered Diffusivities in Lattice Gas Cellular Automata 283
R. Brito, M. H. Ernst, and T. R. Kirkpatrick

Asymptotic Behavior of Densities for Two-Particle Annihilating Random Walks 297
Maury Bramson and Joel L. Lebowitz

Statistics of Transfer Matrices for Disordered Quantum Thin Metallic Slabs 373
Pierre Devillard

Modified Fermi–Dirac Statistics of Fermionic Lattice Gas by the Back-Jump Correlations 389
T. Barszczak and R. Kutner

On the Limiting Distribution of Pair-Summable Potential Functions in Many-Particle Systems 399
Kevin A. O'Neil and Richard A. Redner

On the Trace Map for Products of Matrices Associated with Substitutive Sequences 411
Jacques Peyrière

SHORT COMMUNICATIONS

A Random Field Model for Anomalous Diffusion in Heterogeneous Porous Media 415
James Glimm and David H. Sharp

Freezing of Nonequilibrium Domain Structures in a Kinetic Ising Model 425
J. Jäckle, R. B. Stinchcombe, and S. Cornell

Geometric Localization of the Threshold in Two-Dimensional Ising $\pm J$ Spin Glasses for $T=0$ 435
J. Bendisch

Interface Motion in a Two-Dimensional Ising Model with a Field 443
Pierre Devillard

On Correction to Scaling for Two- and Three-Dimensional Scalar and Vector Percolation 453
Muhammad Sahimi and Sepehr Arbabi

Evidence for Spinodal Singularities in High-Dimensional Nearest-Neighbor Ising Models 463
T. S. Ray

Pair-Correlated Patterns in Hopfield Model of Neural Networks 473
Francisco A. Tamarit and Evaldo M. F. Curado

Poisson Point Processes, Cascades, and Random Coverings of R^n 481
F. Koukiou and P. Picco

DEPARTMENTS

Book Review: Statistical Mechanics of Magnetically Ordered Systems 491
Amnon Aharony, Ora Entin-Wohlman, and Victor Fleurov

Book Review: Synergetics and Dynamical Instabilities 493
Bruce J. West

Book Review: The Nonequilibrium Statistical Mechanics of Open and Closed Systems 497
Shaul Mukamel

Book Review: Statistical Theory of Heat: Non-Equilibrium Phenomena 499
Irwin Oppenheim

Book Review: Finite-Size Scaling, Vol. 2 501
George H. Weiss

Erratum 503
Masafumi Fujimoto

Addendum 505
A. C. D. van Enter, Joan Adler, and J. A. M. S. Duarte

Future Contributions to *Journal of Statistical Physics* 507

JOURNAL OF STATISTICAL PHYSICS

Vol. 62, Nos. 3/4 February 1991

CONTENTS

ARTICLES

The One-Dimensional Hubbard Model for Large or Infinite U 509
A. Mielke

Finite-Size Scaling for Potts Models 529
Christian Borgs, Roman Kotecky, and Salvador Miracle-Solé

Finite-Size Effects in a Field-Theoretic Model with Long-Range Exchange Interaction 553
Elka R. Korutcheva and Nicholai S. Tonchev

Finite-State Neural Networks. A Step Toward the Simulation of Very Large Systems 563
G. A. Kohring

Convergence of Spherical Harmonic Expansions for the Evaluation of Hard-Sphere Cluster Integrals 577
George D. J. Phillies

Fluctuations in the Curie–Weiss Version of the Random Field Ising Model 587
J. M. G. Amaro de Matos and J. Fernando Perez

Field-Induced Percolation in a Polarized Lattice Gas 609
Marc Aertsens and Jan Naudts

Recurrence of Kolmogorov–Arnold–Mosen Tori in Nonanalytical Twist Maps 631
Bambi Hu, Jicong Shi, and Sang-Yoon Kim

Some Results on the Behavior and Estimation of the Fractal Dimensions of Distributions on Attractors 651
C. D. Cutler

On the Number of Invariant Measures for Higher-Dimensional Chaotic Transformations 709
P. Góra, A. Boyarsky, and H. Proppe

Brownian Motion Near an Absorbing Sphere 729
Anne Boutet de Monvel-Berthier and Petre Dita

Diffusion and Propagation in Triangular Lorentz Lattice Gas Cellular Automata 737
X. P. Kong and E. G. D. Cohen

Glauber Dynamics of Fluctuations 759
D. Goderius, A. Verbeure, and P. Vets

Recurrent Versus Diffusive Dynamics for a Kicked Quantum System 779
M. Combescure

Diffusive Energy Growth in Classical and Quantum Driven Oscillators 793
L. Bunimovich, H. R. Jauslin, J. L. Lebowitz, A. Pellegrinotti, and P. Nielaba

Algorithmic Treatment of the Spin-Echo Effect 819
Seth Lloyd and Wojciech H. Zurek

About the Notion of Truth in Quantum Mechanics 841
Roland Omnès

SHORT COMMUNICATION

Random Walk in Random Environment: A Counterexample without Potential 863
Maury Bramson

DEPARTMENTS

Book Review: *Schrödinger: Life and Thought* 877
Michael F. Shlesinger

Book Review: *Noise and Chaos in Nonlinear Dynamical Systems* 879

Book Review: *Chaotic Dynamics—An Introduction* 883
M. Gitterman

Future Contributions to *Journal of Statistical Physics* 885

JOURNAL OF STATISTICAL PHYSICS

Vol. 62, Nos. 5/6 March 1991

CONTENTS

This issue contains the Proceedings of the Workshop on Dynamics of Concentrated Systems held at Los Alamos, June 13–15, 1990

ARTICLES

Preface: Dynamics of Concentrated Systems 887
A. L. Graham, M. Gottlieb, and F. Dowell

Dynamics of Complex Flow 889
S. F. Edwards

A Dynamical Test of Phase Transition Order: New Things in Old Places or Old Wine in New Bottles 899
P. E. Cladis

Overview of Partial Orientational and Positional Ordering in Concentrated Systems 927
F. Dowell

A New Method for Determining Hydrodynamic Effects on the Collision of Two Spheres 945
Fred Gelbard, Lisa A. Mondy, and Steven E. Ohrt

Aggregation of Colloidal Particles with a Finite Interparticle Attraction Energy 961
Wan Y. Shih, Jun Liu, Wei-Heng Shih, and Ilhan A. Aksay

Applications of Liquid Crystal Polymers 985
Michael Jaffe

Neutron Scattering Studies of Molecular Conformations in Liquid Crystal Polymers 997
L. Noirez, F. Moussa, J. P. Cotton, P. Keller, and G. Pépy

Shearing Apparatus for Neutron Scattering Studies on Fluids: Preliminary Results for Colloidal Suspensions 1015
G. C. Straty, H. J. M. Hanley, and C. J. Glinka

Field-Induced Anisotropy in Concentrated Systems of Rigid Particles and Macromolecules 1025
Gerald G. Fuller, Kaye Smith, and Wesley R. Burghardt

Rheology of Nematic Solutions of Rodlike Chains: Comparison of Theory and Experiment 1041
G. C. Berry and Mohan Srinivasarao

Theoretical Predictions of Diffusion from Brownian Motion in Superstrong Polymers 1059
F. Dowell

Rheology of Suspensions of Rodlike Particles 1073
Robert L. Powell

Macrotransport Processes: Brownian Tracers as Stochastic Averages in Effective-Medium Theories of Heterogeneous Media 1095
Howard Brenner

A Lattice Gas Model for Thermohydrodynamics 1121
Shiyi Chen, Hydong Chen, Gary D. Doolen, Semion Gutman, and Minxu Lee

Lorentz Lattice Gases, Abnormal Diffusion, and Polymer Statistics 1153
X. P. Kong and E. G. D. Cohen

The Flow of a Model Suspension Fluid Past a Sphere 1173
N. Phan-Thien, R. Zheng, and A. L. Graham
Towards *ab Initio* Simulations of Concentrated Suspensions 1197
Sangtae Kim, Yuris O. Fuentes, and Seppo J. Karrila
Moćeling of Concentrated Suspensions 1225
B. H. A. A. van den Brule and R. J. J. Jongschaap
Nonequilibrium Brownian Dynamics Simulations of Shear Thinning in Concentratred Colloidal Suspensions 1239
Gerald Wilemski
Hydrodynamic Interactions of Dilute Polymer Solutions in Elongational Flow 1255
A. E. Chávez, M. López de Haro, and O. Manero
Program of the Workshop 1267
Future Contributions to *Journal of Statistical Physics* 1271

JOURNAL OF STATISTICAL PHYSICS

Vol. 63, Nos. 1/2 April 1991

CONTENTS

ARTICLES

Block Toeplitz Matrices and the Two-Dimensional Coulomb Gas Near a Wall 1
P. J. Forrester and T. M. Morrow

Effective-Field Theory of Spin Glasses and the Coherent-Anomaly Method. I 25
Naomichi Hatano and Masuo Suzuki

Fluctuations in the Motions of Mass and of Patterns in One-Dimension Driven Diffusive Systems 47
H. van Beijeren

On the Parallel Dynamics for the Little–Hopfield Model 59
A. E. Patrick and V. A. Zegrebnov

A Parallel Multigrid Algorithm for Percolation Clusters 73
R. C. Brower, Pablo Tamayo, and Bryant York

Direction–Direction Correlations of Oriented Polymers 89
Jeffrey D. Miller

Upper Bounds for Survival Probability of the Contact Process 115
Makoto Katori and Norio Konno

Scaling Properties of the Measure of Constant Topological Entropy 131
Yuzhen Ge

High-Density Properties of Hard Spheres within a Modified Percus–Yevick Theory: The Role of Thermodynamic Consistency 141
P. V. Giaquinta, G. Giunta, and G. Malescio

Random Sequential Addition: A Distribution Function Approach 167
Gilles Tarjus, Pierre Schaaf, and Julian Talbot

A Kinetic Model for Droplet Growth in the Transition Regime 203
G. F. Hubmer and U. M. Titulaer

Chaotic Oscillations and Noise Transformations in a Simple Dissipative System with Delayed Feedback 221
V. V. Zverev and B. Ya. Rubinstein

Note on Transport Processes in Dense Colloidal Suspensions 241
E. G. D. Cohen and I. M. de Schepper

Size Dependence of Self-Diffusion in the Hard-Square Lattice Gas 249
J. Jäckle, K. Fröbose, and D. Knödler

The Energy Level Spacing for Two Harmonic Oscillators with Generic Ratio of Frequencies 261
P. M. Bleher

A New Rigorous Upper Bound for the Inverse Critical Temperature of the Two-Dimensional Coulomb Gas 285
Gastão de Ameida Braga

Gravity in one Dimension: Diffusion in Acceleration 291
Bruce N. Miller

On the Convection of a Passive Scalar by a Turbulent Gaussian Velocity Field 305
T. C. Lipscombe, A. L. Frenkel, and D. ter Haar

Effects of an Oscillating Field on a Diffusion Process in the Presence of a Trap 315
Moshe Gitterman, Shlomo Havlin, and George H. Weiss

Fluid Dynamic Limits of Kinetic Equuations. I. Formal Derivations 323
Claude Bardos, François Golse, and David Levermore

The Homogeneous Boltzmann Hierarchy and Statistical Solutions to the Homogeneous Boltzmann Equation 345
L. Arkeryd, S. Caprino, and N. Ianiro

The Inverse Conjecture for the Revised Enskog Equation 363
Marco Cannone and Carlo Cercignani

SHORT COMMUNICATIONS

Metastable Systems Driven by Colored Noise: The Stationary State 389
Ivo Klik

Trapping without Traps by Correlated Random Walks 399
Panos Argyrakis and Klaus W. Kehr

Simulation of Flow through a Two-Dimensional Random Porous Medium 405
U. Brossa and D. Stauffer

Calculation of the Permeability of Porous Media Using Hydrodynamic Cellular Automata 411
G. A. Kohring

Difference Between Canonical and Grand Canonical Ensembles in Discrete Lattice Gas Models 419
R. Németh

DEPARTMENTS

Program of the Australian Statistical Mechanics Meeting 425

Program of the Statistical Mechanics at the 45th Parallel 4th Annual Meeting 427

ARTICLES

Corner Transfer Matrices of the Chiral Potts Model 433
R. J. Baxter

The Phase Transition in the Discrete Gaussian Chain with $1/r^2$ Interaction Energy 455
J. Fröhlich and B. Zegarlinski

Lattice Animals: Supplementation of Perimeter Polynomial Data by Graph-Theoretic Methods 487
M. F. Sykes and Sylvia Flesia

Finite-Size Corrections to the Free Energy of Coulomb Systems with a Periodic Boundary Condition 491
P. J. Forrester

Finite-Size Effects in Random Energy Models and in the Problem of Polymers in a Random Medium 505
J. Cook and B. Derrida

Instability of the Anomalies in the One-Dimensional Anderson Model at Weak Disorder 541
Athanasios Speis

Transmission of Waves by a Nonlinear Random Medium 567
R. Knapp, G. Papanicolaou, and B. White

Noise-Induced Asymptotic Periodicity in a Piecewise Linear Map 585
Nicholas Provatas and Michael C. Mackey

Stability of Incoherence in a Population of Coupled Oscillators 613
Steven H. Strogatz and Renato E. Mirollo

Cluster Growth in Particle-Conserving Cellular Automata 637
Tamotsu Kohyama

Dynamical and Spatial Aspects of Sandpile Cellular Automata 653
Kim Christensen, Hans C. Fogedby, and Henrik Jeldtoft Jensen

On a Forest Fire Model with Supposed Self-Organized Criticality 685
Peter Grassberger and Holger Kantz

The Scaling of Higher Cumulants in a Diffusion Problem 701
N. I. Lebedev and A. S. Sigov

A Reinterpretation of Dense Gas Kinetic Theory 707
R. F. Snider

Asymmetric Attractive Particle Systems on Z: Hydrodynamic Limit for Monotone Initial Profiles 719
A. Benassi, J. P. Fouque, E. Saada, and M. E. Vares

Classical "Freezing" of Plane Rotations: A Proof of the Boltzmann–Jeans Conjecture 737
Giancarlo Benettin and Francesco Fassò

Bose–Einstein Condensation in an Exactly Soluble System of Interacting Particles 761
O. Penrose

On the Temperature Dependence of the Mean Number of Clusters 783
C. Cammarota

822/65/5-6-31

Binary Nonadditive Hard-Sphere Mixtures at High Dimension 791

CONTENTS

This special issue contains papers dedicated to Jerry Percus on the occasion of his 65th birhday

ARTICLES

Preface 809
M. Aizenman, M. Kalos, and J. L. Lebowitz

Convexity and Concavity of Eigenvalue Sums 811
Elliott H. Lieb and Heinz Siedentop

Strict Monotonicity for Critical Points in Percolation and Ferromagnetic Models 817
Michael Aizenman and Geoffrey Grimmett

Theory of Percolation in Fluids of Long Molecules 837
Kevin Leung and David Chandler

Dynamic Critical Exponent of the BFACF Algorithm for Self-Avoiding Walks 857
Sergio Caracciolo, Andrea Pelissetto, and Alan D. Sokal

Statistical and Systematic Errors in Monte Carlo Sampling 867
Alan M. Ferrenberg, D. P. Landau, and K. Binder

The Hierarchy of Correlations in Random Binary Sequences 883
Aaldert Compagner

On Some Transport Properties of Baker's Maps 897
Stephen Childress and Isaac Klapper

Reaction-Diffusion Fronts in Periodically Layered Media 915
George Papanicolaou and Xue Xin

A Particle Model for Spinodal Decomposition 933
Joel L. Lebowitz, Enza Orlandi, and Errico Presutti

A Mean-Field Equation of Motion for the Dynamic Ising Model 975
O. Penrose

A Stochastic Model of Three-Dimensional Crystal Growth 987
Claude Garrod

Some Properties of a Fractal-Time Continuous-Time Random Walk in the Presence of Traps 1005
George H. Weiss and Shlomo Havlin

Onsager Relations for Transport in Inhomogeneous Media 1019
N. G. van Kampen

Diffusion from Sessile Droplets Through Membranes 1035
G. O. Williams and H. L. Frisch

Flexural Rigidity of a Liquid Surface 1039
Joseph B. Keller and Gregory J. Merchant

Theory of Interfacial Phase Transitions in Surfactant Systems 1053
K. P. Shukla, B. Payandeh, and M. Robert

Finite-Size Effects in Surface Tension. I. Fluctuating Interfaces 1077
D. B. Abraham and N. M. Švrakić

The Wetting Transition in a Random Surface Model 1097
D. B. Abraham and C. M. Newman

Exploiting the Diversity of Time Scales in the Immune System: A B-Cell Antibody Model 1113
Lee A. Segel and Alan S. Perelson

How Do Ovarian Follicles Interact? A Many-Body Problem with Unusual Symmetry and Symmetry-Breaking Properties 1133
H. Michael Lacker and Allon Percus

The Hard-Sphere Order–Disorder Transition in the Bethe Continuum 1163
A. Robledo and C. Varea

Relation Between the Free Energy and the Direct Correlation Function in the Mean Spherical Approximation 1177
L. Blum and Yaakov Rosenfeld

The Nonuniform Hard-Rod Fluid Revisited 1191
M. Q. Zhang

Sticky Spheres and Related Systems 1203
George Stell

Implementing the Fast Multipole Method in Three Dimensions 1223
K. E. Schmidt and Michael A. Lee

Fermion Nodes 1237
D. M. Ceperley

Exact Monte Carlo for Few-Fermion Systems 1269
M. H. Kalos

Future Contributions to *Journal of Statistical Physics* 1283

A Classical Formulation of the Dirac Propagator*
G. N. Ord

Contrasting Properties of Random Disk and Sphere Packings*
Boris D. Lubachevsky, Frank H. Stillinger, and Elliot N. Pinson

On the Isothermal Density Derivation of $g(r)$ and a New Theory of the Pair Correlation Function of Hard Spheres*
L. Reatto, G. Stell, and M. Tau

** These manuscripts dedicated to Jerry Percus will appear in a later issue.*

JOURNAL OF STATISTICAL PHYSICS

CONTENTS

ARTICLES

Two Results Concerning Asymptotic Behavior of Solutions of the Burgers Equation with Force 1
Ya. G. Sinai

Analytic Calculations of Scaling Dimensions: Tricritical Hard Squares and Critical Hard Hexagons 13
Andreas Klümper and Paul A. Pearce

Calculating the Hausdorff Dimension of Tree Structures 77
Lorraine M. Rellick, Gerald A. Edgar, and Michael H. Klapper

Polymers and Random Graphs 87
E. Buffet and J. V. Pulé

Random Surfaces with Two-Sided Constraints: An Application of the Theory of Dominant Ground States 111
A. E. Mazel and Yu. M. Suhov

Power-Law Falloff in Two-Dimensional Coulomb Gases at Inverse Temperature $\beta > 8\pi$ 135
Domingos H. U. Marchetti and Abel Klein

Correlation Functions and the Goldstone Picture for the Hierarchical Classical Vector Model at Low Temperatures in Three or More Dimensions 163
Ricardo Schor and Michael O'Carroll

Limit Probability Distributions for an Infinite-Order Phase Transition Model 193
O. Costin and R. D. Costin

Infinite-Range Mean-Field Percolation: Transfer Matrix Study of Longitudinal Correlation Length 207
V. Privman and L. S. Schulman

Interfacial Approach to d-Dimensional $\pm J$ Ising Models in the Neighborhood of the Ferromagnetic Phase Boundary 227
Y. Ueno and Y. Ozeki

Random Walk Representations of the Heisenberg Model 251
Joseph G. Conlon and Jan Philip Solovej

Bethe Ansatz Results for Hubbard Chains with Toroidal Boundary Conditions 271
M. J. Martins and R. M. Fye

Statistics of Colored Flux Lines 277
K. Ziegler

Crossover Behavior for a Noninteracting Disordered Electronic System in the Presence of a Weak Magnetic Field 309
Jian-Yang Yuan and T. R. Kirkpatrick

Decay of the Remanent Magnetization in the Asymmetric Spin Chain 329
H. Rieger and M. Schreckenberg

Recurrence of the Eigenstates of a Schrödinger Operator with Automatic Potential 363
F. Delyon and J. Peyrière

Wave Chaos in Quantum Systems with Point Interaction 369
S. Albeverio and P. Šeba

Field-Induced Particle Pairing in an Ising System 385
C. E. Paraskevaidis and C. Papatriantafillou

Novel Perturbation Expansion for the Langevin Equation 395
Carl Bender, Fred Cooper, L. M. Simmons, Jr., Pinaki Roy, and Greg Kilcup

Transport Phenomena in a Plane Shock Wave 429
A. G. Bashkirov and A. V. Orlov

New Properties of a Class of Generalized Kinetic Equations 437
Jacek Polewczak and George Stell

DEPARTMENTS

Book Review: The Quantum Statistics of Dynamic Processes 465
Irwin Oppenheim

ARTICLES

Foreword 899
Lui Lam

Pinning and Long-Time-Scale Behavior in Traveling-Wave Convection 903
Daniel R. Ohlsen, S. Y. Yamamoto, C. M. Surko, and Paul Kolodner

The Effect of a Coriolis Force on Taylor–Couette Flow 913
Richard J. Wiener, Philip W. Hammer, Charles E. Swanson, David C. Samuels, and Russell J. Donnelly

Novel States in Taylor–Couette Flow Subjected to a Coriolis Force 927
Li Ning, Guenter Ahlers, and David S. Cannell

Dispersive Chaos 945
James A. Glazier, Paul Kolodner, and Hugh Williams

Regimes of Oscillation in a Linear Array of Vortices 961
H. Willaime, O. Cardoso, and P. Tabeling

Temporal Forcing of Wave Patterns 969
D. Walgraef

Localized Bifurcations and Defect Instabilities in the Convection of a Nematic Liquid Crystal 981
A. Joets and R. Ribotta

Interaction and Dynamics of Defects in Convective Roll-Patterns of Anisotropic Fluids 1007
Eberhard Bodenschatz, Andreas Weber, and Lorenz Kramer

The Measurement of Subcritical Electroconvection 1017
I. Rehberg, F. Horner, and G. Hartung

Patterns at the Onset of Electroconvection in Freely Suspended Smectic Films 1025
Stephen W. Morris, John R. de Bruyn, and A. D. May

The Role of Defects in the Transition Between Different Symmetries in Convective Patterns 1045
S. Ciliberto, E. Pampaloni, and C. Perez-Garcia

Basic Considerations in Flowing Electrorheological Fluids 1059
James E. Stangroom

Characteristics and Mechanisms of Electrorheological Fluids 1073
Hans Conrad and Arnold F. Sprecher

Structure and Dynamics of a Dense Dipolar System in an Electric Field and Their Relevance to Electrorheological Fluids 1093
N. K. Jaggi

A Prepared Pattern with Wavelength Selection in Directional Solidification 1103
P. E. Cladis

Fluctuating Hydrodynamics and Principal Oscillation Pattern Analysis 1121
Alejandro García and Cécile Penland
Lattice Gas Automata for Simple and Complex Fluids 1133
Shiyi Chen, G. D. Doolen, and W. H. Matthaeus
Future Contributions to *Journal of Statistical Physics* 1163

Do the Simple and 2/3 Majority Models Belong to the Same Universality Class?: A Monte Carlo Approach 387
Luciano R. da Silva, Uriel M. S. Costa, and Constantino Tsallis

Are Layered Two-Dimensional Quasicrystals Periodic in the Third Direction? 395
S. E. Burkov

Origin of Rate Dependence in Frictional Sliding 403
John B. Rundle and Stephen R. Brown

Erratum: Hypercube Stacking: A Potts-Spin Model for Surface Growth 413
Bruce M. Forrest and Lei-Han Tang

Erratum: Size Dependence of Self-Diffusion in the Hard-Square Lattice Gas 415
J. Jäckle, K. Froböse, and D. Knödler

Erratum and Addendum: Some Results on the Behavior and Estimation of the Fractal Dimensions of Distributions on Attractors 417
C. D. Cutler

Addendum: Note on Transport Processes in Dense Colloidal Suspensions 419
E. G. D. Cohen and I. M. de Schepper

Future Contributions to *Journal of Statistical Physics* 421

JOURNAL OF STATISTICAL PHYSICS

Vol. 65, Nos. 3/4 November 1991

CONTENTS

ARTICLES

Thermodynamics of a Model with Interacting Annealed Bond Impurities on the Bethe Lattice 423
B. M. Mulder, C. Krikos, and C. Papatriantafillou

Restrictions on the Phase Diagram for a Large Class of Multisite Interaction Spin System 445
James L. Monroe

New Universality Classes in "Percolative" Dynamics 453
M. Ortuño, J. Ruiz, and J. M. F. Gunn

"Almost" Mean-Field Ising Model: An Algebraic Approach 469
F. Bagarello and C. Trapani

First-Order Transitions in One-Dimensional Systems with Local Couplings 483
M. Asorey and J. G. Esteve

Statistics of Two-Dimensional Point Vortices and High-Energy Vortex States 495
L. J. Campbell and Kevin O'Neil

A Maximum-Entropy Principle for Two-Dimensional Perfect Fluid Dynamics 531
Raoul Robert

Externally Perturbed Unstable Systems 555
H. A. Posch, Heide Narnhofer, and W. Thirring

Embedology 579
Tim Sauer, James A. Yorke, and Martin Casdagli

Invariant Curves for Area-Preserving Twist-Maps far from Integrable 617
Alessandra Celletti and Luigi Chierchia

Directed Random Walks in Random Environments 645
E. Buffet and P. Hannigan

Two-Dimensional Random–Random Walks: Dynamical Exponents in a Quenched Directed Model 673
Claude Aslangul, Marc Barthélémy, Noëlle Pottier, and Daniel Saint-James

Random Walk on a Disordered Directed Bethe Lattice 695
C. Aslangul, M. Barthélémy, N. Pottier, and D. Saint-James

Power Law Growth for the Resistance in the Fibonacci Model 715
B. Iochum and D. Testard

Statistical Properties of Aggregation with Injection 725
Hideki Takayasu, Misako Takayasu, Astero Provata, and Greg Huber

Exact Solution of the Boltzmann Equation in the Homogeneous Color Conductivity Problem 747
V. Garzó and A. Santos

Kubo–Einstein Relation for Quantum Brownian Motion in a Periodic Potential 761
Yong-Cong Chen

Random-Matrix Model for Dissipative Two-Level Systems 773
Pedro Pereyra

Explicit Unitary Schemes to Solve Quantum Operator Equations of Motion 793
Zhang Mei-Qing

Critical Fluctuations for Quantum Mean-Field Models 801
M. Fannes, A. Kossakowski, and A. Verbeure

Distribution for Fermionic Discrete Lattice Gas within the Canonical Ensemble 813
R. Kutner and T. Barszczak

Book Review: *Kinetics of Diffusion Controlled Chemical Processes* 823
George H. Weiss

Book Review: *Statistical Models for the Fracture of Disordered Media* 825
Robert Englman

Program of the 65th Semiannual Statical Mechanics Meeting 827

Future Contributions to *Journal of Statistical Physics* 835

JOURNAL OF STATISTICAL PHYSICS

Vol. 65, Nos. 5/6 December 1991

CONTENTS

ARTICLES

Introduction 837

The Dimer–Trimer Model for Heterogeneous Catalysis 839
D. ben-Avraham and J. Köhler

Fluctuation-Dominated Kinetics in the $A + B \to 0$ Reaction Between Immobile Particles 849
A. Blumen, S. Luding, and I. M. Sokolov

Uses and Abuses of the Langevin Equation for Chemical Reactions in Condensed Phases 859
Irwin Oppenheim and Alex Orsky

Some Properties of the $A + B \to C$ Reaction-Diffusion System with Intially Separated Components 873
Haim Taitelbaum, Shlomo Havlin, James E. Kiefer, Benes Trus, and George H. Weiss

Space- and Time-Resolved Diffusion-Limited Binary Reaction Kinetics in Capillaries: Experimental Observation of Segregation, Anomalous Exponents, and Depletion Zone 893
Yong-Eun Lee Koo and Raoul Kopelman

The Diffusion-Limited Reaction $A + B \to 0$ on a Fractal Substrate 919
E. Clément, R. Kopelman, and L. M. Sander

Analytical Solution of an Irreversible Surface Reaction Model 925
E. Clément, P. Leroux-Hugon, and L. M. Sander

Spatial Structure in Diffusion-Limited Two-Particle Reactions 941
Maury Bramson and Joel L. Lebowitz

Fluctuations and Correlations in a Diffusion-Reaction System: Exact Hydrodynamics 953
Charles R. Doering, Martin A. Burschka, and Werner Horsthemke

Reaction, Trapping, and Multifractality in One-Dimensional Systems 971
C. Van den Broeck

Trapping Aspects in Enhanced Diffusion 991
G. Zumofen, J. Klafter, and A. Blumen

Transient $A + B \to 0$ Reaction on Fractals: Stochastic and Deterministic Aspects 1015
G. Zumofen, J. Klafter, and A. Blumen

Many-Body Effects in Diffusion-Limited Kinetics 1025
A. M. Berezhkovskii, Yu. A. Makhnovskii, and R. A. Suris

Spatial Organization in Two-Species Annihilation 1043
S. Redner and F. Leyvraz

Reversible Diffusion-Influenced Reactions: Comparison of Theory and Simulation for a Simple Model 1057
Attila Szabo and Robert Zwanzig

Reversible Trapping on a Cubic Lattice: Comparison of Theory and Simulations 1085
Peter M. Richards and Attila Szabo

Fluctuation Kinetics of Diffusion-Controlled Processes: Strong Effects Due to Correlations and Fluctuations 1095
S. F. Burlatsky and G. S. Oshanin

Reaction Kinetics in Polymer Systems 1109
G. S. Oshanin and S. F. Burlatsky

Population Growth in Random Media. I. Variational Formula and Phase Diagram 1123
A. Greven and F. den Hollander

Population Growth in Random Media. II. Wavefront Propagation 1147
A. Greven and F. den Hollander

Effect of Disorder on the Trapping of Frenkel Excitons in Three-Dimensional Systems 1155
D. L. Huber and W. Y. Ching

Quantum and Stochastic Aspects of Low-Temperature Trapping and Reaction Dynamics 1161
P. E. Parris

Diffusion and Reaction among Traps: Some Theoretical and Simulation Results 1173
S. Torquato

One-Dimensional Non-Nearest-Neighbor Random Walks in the Presence of Traps 1207
Robert J. Rubin

Flux to a Trap 1217
Robert M. Ziff

Diffusion-Annihilation and the Kinetics of the Ising Model in One Dimension 1235
Fereydoon Family and Jacques G. Amar

A Model of Turbulent Mixing in the $A + B \rightarrow 0$ Reaction 1247
William D. Deering and Bruce J. West

Bimolecular Annihilation Reactions: Immobile Reactants and Multipolar Interactions 1261
S. Luding, H. Schnörer, V. Kuzovkov, and A. Blumen

Scaling Properties of Diffusion-Limited Reactions on Fractal and Euclidean Geometries 1269
Katja Lindenberg, Wen-Shyan Sheu, and Raoul Kopelman

Author Index to Volume 62, 63, 64, and 65 1285
